For many, **avalon** is a mystical place of great power, it remains a symbol of hope and the search for Avalon is for some a lifelong quest. It has connotations of nature and beauty and the use of the iconic device as part of the logo defines and reinforces these organic images.

**enhancing your natural smile:** this underpins our commitment to provide all patients with appropriate treatment, taking into account their wishes, age and lifestyle.

**It may come as no surprise to you but the two things that leave the most lasting impression are your eyes and your teeth.**

The team here at Avalon can help you attain that great smile using **modern**, evidence based techniques. We are a small practice so can offer **personalised** attention without long waits. We appreciate that finding the right dentist is important so our modern air-conditioned facilities have been designed with you in mind. We are willing to work with anxious patients, to help you overcome these feelings & make you feel **secure and comfortable** during treatment.

We work with you and involve you in all decisions regarding your treatment. We take time to gather all the facts & present them to you in a logical order. Options & recommendations are discussed and you have the final decision.

Michael Day qualified from Birmingham University in 1976 and has been practising dentistry in Crawley since 1977. He has a special interest in **advanced cosmetic techniques**, including restorative, implant, periodontal and preventive dentistry. Everyone is entitled to a beautiful smile and with today's modern techniques it's easier than ever.

- **Oral Hygiene** We have a resident hygienist whose main aim is to keep your breath fresh and your gums in tip-top condition. Hygienists are highly qualified professionals whose work is equal to dentists. Emphasis is always placed on good oral hygiene.
- **Implants** If you have missing teeth or loose dentures we can provide attractive, permanent teeth.
- **Pain free** procedures in all cases.
- **Tooth Whitening** Modern treatments can reveal the bright, white, younger smile you've always wanted.
- **Cosmetic Treatments** Veneers, crowns and bridges can restore chipped or missing teeth.
- **White fillings** (mercury free) are used exclusively.
- **Itemised treatment plans and estimates** We listen to your requirements then offer appropriate advice and explanations.
- **Emergency Cover** for registered patients.
- **Payment Plans** offering flexible payment options are available for all.
